MUHAMMAD NISHAD

MERN STACK DEVELOPER

Kerala, India | +91 9778580349 | muhammadniishad786@gmail.com

GitHub | LinkedIn | Portfolio

PROFILE

MERN Stack Developer with a BSc in Computer Science and hands-on experience building full-stack web applications through internship training and personal projects. Proficient in React.js, Next.js, Node.js, Express.js, MongoDB, REST APIs, and Redux Toolkit, with experience in JWT authentication, third-party API integration, and responsive UI development.

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript (ES6+), TypeScript, React.js, Next.js, Tailwind CSS, Redux Toolkit
Backend: Node.js, Express.js, REST APIs, JWT Authentication, Middleware, MVC Architecture
Database: MongoDB, Mongoose, CRUD Operations, Data Modeling, Aggregation, Populate
API Integration: Axios, Google Gemini API, Third-Party API Integration
Tools & Deployment: Git, GitHub, Postman, VS Code, npm, Render, Vercel, Figma

EXPERIENCE

Full-Stack Developer Intern – CodeMe *Aug 2026 – Sep 2026*

- Developed full-stack application features using JavaScript, React.js, Node.js, Express.js, and MongoDB.
- Implemented REST API endpoints and integrated frontend components with backend services and database operations.
- Built reusable React components and responsive user interfaces to support consistent application experiences.
- Used Git and GitHub for source control and debugged frontend and backend issues during development.

PROJECTS

IronMind – AI-Powered Fitness Tracking Platform *Live Demo GitHub*

Next.js, TypeScript, Tailwind CSS, Redux Toolkit, Node.js, Express.js, MongoDB, Gemini API

- Developed a responsive fitness tracking application using Next.js and TypeScript with dashboard-based workout management and progress monitoring.
- Implemented user registration, login, JWT-based authentication, protected routes, and profile management.
- Built workout workflows for exercise selection, sets, reps, weight tracking, workout completion, workout history, progress statistics, and personal records.
- Integrated Google Gemini API to provide AI-powered fitness guidance and workout assistance.
- Connected the frontend to an Express.js backend with MongoDB and Mongoose, using Redux Toolkit for state management and Axios service modules for API communication.

Sneak.in – Full-Stack Footwear E-Commerce Platform *Live Demo GitHub*

React.js, Node.js, Express.js, MongoDB, Mongoose, Redux Toolkit, Tailwind CSS

- Developed a full-stack footwear e-commerce application with product browsing, authentication, cart management, checkout, order processing, and administration workflows.
- Implemented JWT-based authentication, password hashing with bcrypt, protected routes, and role-based authorization.
- Built REST APIs for product CRUD operations, product search and filtering, image uploads, and inventory management.
- Implemented cart, address management, cash-on-delivery checkout, order cancellation, order status tracking, and database-backed product and order workflows.
- Connected the application to MongoDB Atlas and deployed the frontend and backend separately using Render.

EDUCATION

Bachelor of Science in Computer Science *2026*

University of Calicut – Prajyoti Niketan College, Pudukad

CERTIFICATION

MERN Stack Development – CodeMe *5-Month Course | 2026*
