

MUHAMMAD NISHAD

MERN STACK DEVELOPER

📍 Kerala, India — 📞 +91 9778580349 — ✉ Email
🌐 GitHub — 🔗 LinkedIn — 🌐 Portfolio

PROFILE

MERN Stack Developer with a BSc in Computer Science and hands-on experience building and deploying full-stack web applications using React.js, Node.js, Express.js, and MongoDB. Experienced in REST APIs, JWT authentication, role-based authorization, Redux Toolkit, and responsive UI development.

FULL-STACK DEVELOPMENT EXPERIENCE

MERN Stack Developer – Project Experience

2026 – Present

- Developed and deployed full-stack MERN applications covering frontend development, REST APIs, database operations, authentication, and production deployment.
- Implemented JWT authentication, bcrypt password hashing, protected routes, and role-based authorization for user and admin access.
- Built RESTful APIs using Node.js and Express.js with MongoDB/Mongoose for CRUD operations, data modeling, and validation.
- Managed application state using Redux Toolkit and asynchronous API operations through reusable Axios service modules.

PROJECTS

Sneak.in – Full-Stack E-Commerce Platform

Live Demo

React.js, Node.js, Express.js, MongoDB

- Engineered a full-stack footwear e-commerce platform with 7+ major modules including authentication, products, cart, addresses, checkout, orders, and administration.
- Implemented JWT authentication, bcrypt password hashing, protected routes, and role-based authorization for customer and admin workflows.
- Developed product APIs with CRUD operations, image uploads, search, category filtering, sorting, and inventory management.
- Built shopping workflows covering cart management, address selection, checkout, order creation, cancellation, and tracking.
- Integrated Redux Toolkit with asynchronous thunks and reusable Axios service modules for frontend API communication.
- Connected MongoDB Atlas for persistent data storage and deployed the frontend and backend separately using Render.

IronMind – Gym Workout Tracking Platform

Live Demo

React.js, Node.js, Express.js, MongoDB

- Developed a full-stack gym workout tracking platform for creating workouts, managing exercises, and recording training data.
- Implemented JWT authentication with protected routes for secure user registration, login, and workout management.
- Built workout and exercise management APIs using Node.js, Express.js, MongoDB, and Mongoose.
- Implemented workout tracking for exercises, sets, reps, weight, rest time, workout completion, and workout history.
- Designed reusable React components and integrated REST APIs using Axios for seamless frontend-backend communication.

TECHNICAL SKILLS

Frontend: HTML, CSS, JavaScript, React.js, Tailwind CSS, React Router, Redux Toolkit

Backend: Node.js, Express.js, REST APIs, JWT Authentication, Middleware, MVC Architecture

Database: MongoDB, Mongoose, CRUD Operations, Data Modeling, Populate, Aggregation

Tools: Git, GitHub, Postman, VS Code, Figma, Axios, Render, Vite

EDUCATION

Bachelor of Science in Computer Science – 2026

University of Calicut

Prajyoti Niketan College, Pudukad
